# How to Open Two Windows on One Screen

If you only have one screen to work on but would like to show two different windows (applications) on the one screen do the following. In the example below we will use AIM and Imaging, but this will work for any applications.

1. Open the first application. (AIM)
2. Hold the windows Key and hit the right arrow.

3. Open the second application. (Imaging)
4. Hold the windows Key and hit the left arrow.
